

Type - Premium High Visibility Trousers | **Range** - High Visibility

PREMIUM HIGH VISIBILITY TROUSERS

Style: CL-S002

Fabric: 80% Polyester, 20% Cotton (280gsm, Twill)

High tenacity core spun polyester thread, 60 tex

The Premium High Visibility Trousers are water- and stain-resistant, featuring a partially elasticated waist for easy fit and comfort with non-metal zips throughout. Core-spun polyester threads, known for their durability and resistance to abrasion, make these versatile trousers highly durable. Combined with triple-stitched seams, reinforced bar-tack stitching on high-stress areas, a diamond crotch and a reinforced seat back area, they are the definitive trousers for quarry and aggregate workers. Core-spun polyester offers a unique resistance against colour fading when exposed to sunlight or washing. They include conformity to the latest version of EN20471 (High Visibility Warning Clothing) and a Railway Group Standard RIS-3279-TOM Hi-Vis orange, the latter suitable for those working on and around railway tracks.

Garment Features

- Water & Stain Repellent Finish
