

**Type** - Premium High Visibility Boilersuit | **Range** - High Visibility

## PREMIUM HIGH VISIBILITY BOILERSUIT

**Style:** CL-S004

**Fabric:** 80% Polyester, 20% Cotton (280gsm, Twill)

High tenacity core spun polyester thread (60 tex)

The Premium high visibility boilersuit features hi-vis tape on the arms, legs, chest and shoulders to provide outstanding wearer visibility while the heavyweight fabric and rugged design ensure the coverall lasts longer. Elastic at the waist provides a comfortable fit. Core-spun polyester threads, known for their durability and resistance to abrasion, make this versatile coverall boilersuit highly durable. Combined with triple-stitched seams, reinforced bar-tack stitching on high-stress areas, a diamond crotch and a reinforced seat back area, this is the definitive coverall boilersuit for quarry and aggregate workers. Made from core-spun polyester, it offers a unique resistance against colour fading when exposed to sunlight or washing. Conforms to EN20471 (High Visibility Warning Clothing) and a Railway Group Standard RIS-3279-TOM Hi-Vis orange, the latter suitable for those working on and around railway tracks.

### Garment Features
