FLAME RETARDANT JACKET

Style: 143

Fabric: 340gsm, Flame Retardant (100% Cotton)

A classic industry standard flame retardant jacket. Manufactured in the well established, 100% flame retardant cotton Proban fabric. A traditional engineers jacket to meet the needs of general welding and allied processes.

Garment Features

- Five (5) concealed front stud fastenings allowing the garment to be fastened to the neck for added protection
- Three (3) pockets, one (1) breast and two (2) patch pockets with flaps (1cm wider than the pocket) to prevent ingress from welding splatter
- Bartacks at stress points for extra strength
