Fully Managed Mat Rental, Collection & Laundry Service

PROTECTING FLOORS, PROTECTING PEOPLE

CLEAN
LINEN & WORKWEAR

WHY MATS MATTER

Dirt, dust, spills and moisture can quickly become more than a cleaning issue.

They can create risks for the people using your building. CLEAN's floor protection mats help capture contamination at the source, protecting floors from the everyday dirt and moisture brought in through entrances and busy areas.

By trapping contaminants before they spread and helping control moisture at the point of entry, our mats support safer, cleaner spaces for employees, customers and visitors while helping reduce the cleaning burden throughout your building.

Floor protection that works for your business.

From heavy-duty entrance protection to anti-fatigue comfort and branded floor messaging, our range is designed around the way your people and customers use your space.

Why use floor protection mats?

PROTECT FLOORS

Trap dirt and moisture before they spread throughout your building.

IMPROVE SAFETY

Help reduce slip risks by controlling moisture and contamination.

REDUCE CLEANING

Stop dirt at the entrance rather than allowing it to travel further into your building.

CREATE A BETTER IMPRESSION

Clean, well-maintained entrances help your building look professional.

DO **YOU** KNOW

100 people entering a building every day can bring around **25kg** of dirt onto your floors every year.

Vacuuming only removes around **10%** of dirt. Mats help stop the rest at the door.

CLEAN
LINEN & WORKWEAR
DO YOU KNOW
Some of our entrance mats can **absorb significantly more moisture** than standard carpeted mats, helping keep floors drier and safer.

Part of the ALSCO family

WHAT ARE OUR MATS MADE OF?

The materials used in a mat directly influence how it performs.

From recycled fibres and high-twist yarns to heat-set fibres and durable rubber backing, every element has a role to play in capturing dirt and moisture, providing stability and supporting long-lasting performance.

Our range combines carefully selected materials and construction techniques to create mats suited to different environments, from busy entrances and high-traffic areas to demanding workplaces where comfort, safety and durability are essential.

Recycled fibres

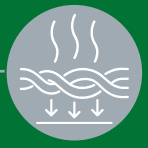

ECONYL® regenerated nylon and recycled PET give waste materials a new life in high-performance matting.

High-twist fibres

Designed to trap dirt within the mat rather than leaving it on the surface.

Heat-set yarns

Help maintain the mat's structure and performance in busy areas.

Durable rubber backing

Provides stability and helps mats stay securely in position.

CLEAN
LINEN & WORKWEAR

RECYCLED MATERIALS

At CLEAN, we believe sustainability and performance should work together.

Our matting range includes products made with ECONYL® regenerated nylon and recycled PET, giving waste materials a new life as high-performance matting.

From discarded nylon waste and fishing nets to post-consumer plastic, these materials are transformed into durable matting designed for demanding environments.

Two materials. Different journeys.
A smarter approach to floor protection.

ECONYL®

Made from discarded Nylon 6 materials and regenerated into high-quality yarn.

RECYCLED PET

Plastic waste is recycled into high-quality PET varn for new matting products.

Part of the ALSCO family

FROM WASTE TO QUALITY FLOOR MAT with ECONYL®

A smarter choice.

ECONYL® is a regenerated nylon made entirely from waste materials. It delivers the same performance as virgin nylon while helping reduce waste and preserve natural resources.

Made to be made again.

ECONYL® yarn can be recycled again and again without losing its quality, supporting a more circular approach to nylon production.

A measurable difference.

8.78 kg CO_2/kg virgin nylon → **1.81** CO_2/kg ECONYL® regenerated nylon

Our switch to ECONYL® regenerated nylon is reported to have saved over 4.25 million kg of CO_2.*

*Other factors also contribute to the overall reduction.

THE PROCESS

01 RECOVER

Discarded Nylon 6 materials, including fishing nets and other nylon waste, are recovered.

02 PROCESS

The materials are cleaned and prepared for regeneration.

03 REGENERATE

The nylon is transformed back into its core raw material.

04 CREATE

The regenerated material is transformed into new ECONYL® yarn.

CLEAN
LINEN & WORKWEAR

FROM WASTE TO QUALITY FLOOR MAT
with recycled PET

Giving plastic waste a new life.

Recycled PET (rPET) is made by transforming post-consumer PET plastic, commonly found in bottles and containers, into high-quality new products. The plastic is cleaned, processed and reformed, giving waste a second life while reducing the demand for virgin plastic.

Circular solutions.

PET is valued for its strength and durability. Recycling it into new products supports a more circular approach, helping materials remain in use rather than becoming waste.

100% POST-CONSUMER RECYCLED PET

- 100 colour options
- High-definition printing
- Vibrant, durable colours

15 MILLION BOTTLES

In 2024, we helped save 15 million plastic bottles from landfill or oceans together with our customers.

THE PROCESS

01 | COLLECT

Post-consumer PET bottles and containers are collected for recycling.

02 | RECYCLE

The plastic is cleaned and processed into recycled PET.

03 | CREATE

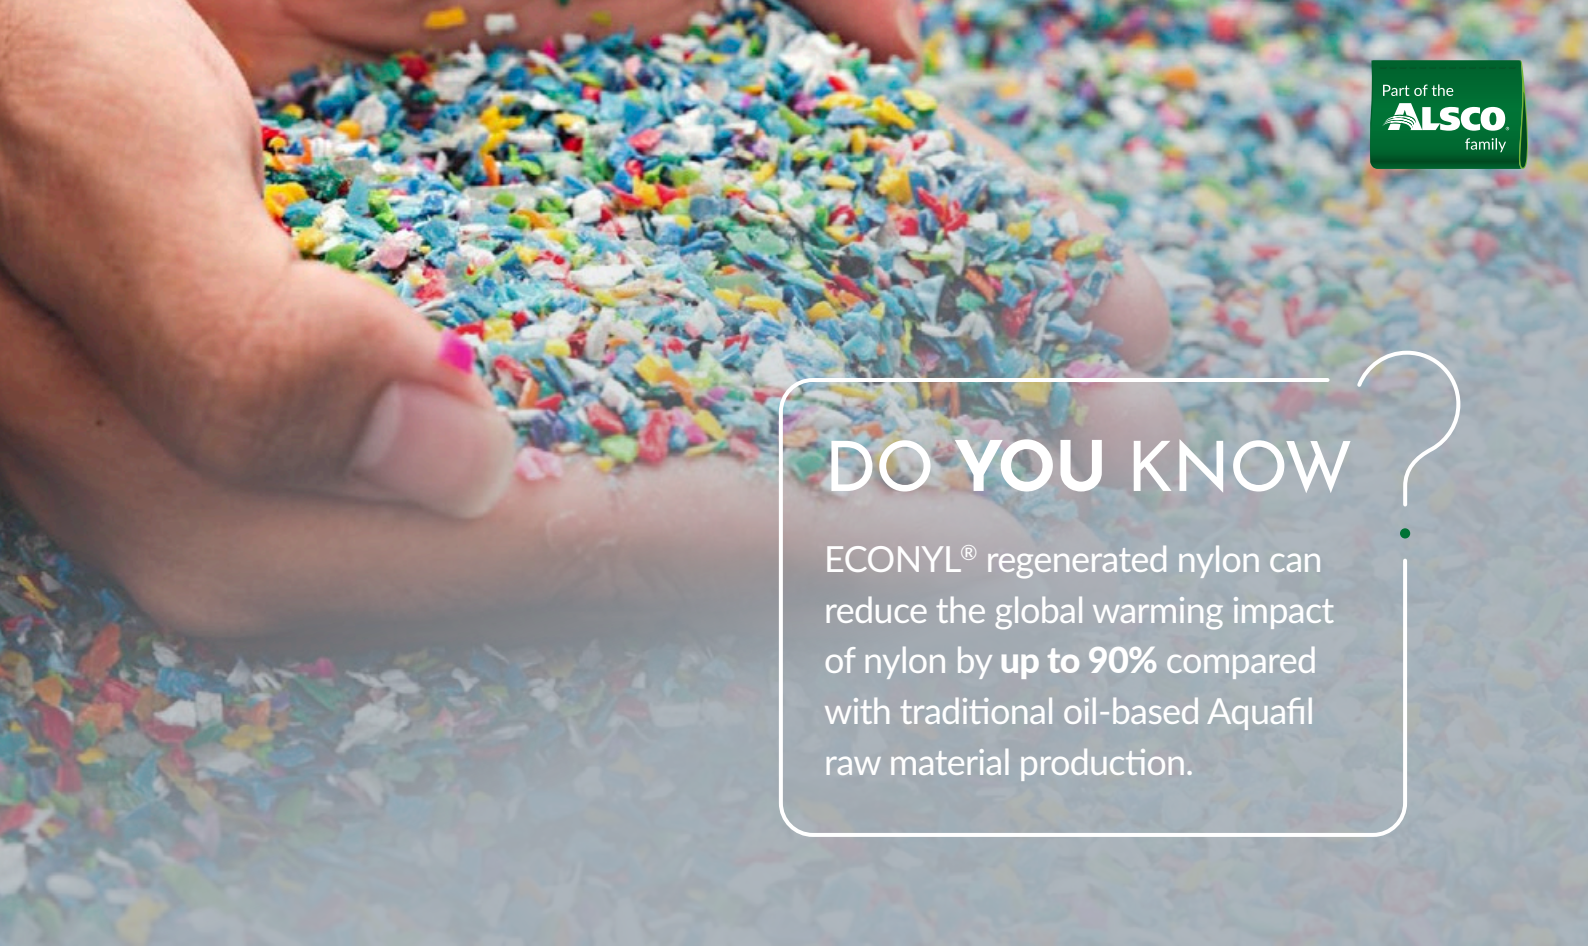

Recycled PET is transformed into yarn.

04 | OUTPUT

The yarn becomes high-performance matting.

Part of the ALSCO family

DO **YOU** KNOW

ECONYL® regenerated nylon can reduce the global warming impact of nylon by **up to 90%** compared with traditional oil-based Aquafil raw material production.

Better mat solutions.

The value of recycled materials is realised when they're transformed into products that perform.

From ECONYL® regenerated nylon to 100% recycled PET, our high-performance mats are built for demanding commercial environments, delivering reliable floor protection throughout their working life.

CLEAN
LINEN & WORKWEAR

A MAT SERVICE THAT WORKS HOW YOU NEED IT TO

Keeping mats clean and performing at their best can be difficult to manage in-house.

Larger mats can be difficult to handle and transport, while cleaning them thoroughly in-house can be impractical.

CLEAN takes care of the laundering for you, with scheduled servicing that keeps clean mats in place and used mats moving through our professional laundry.

Choose from **two service options**, with fortnightly servicing as standard and weekly or monthly frequencies available.

ONE MANAGED SERVICE. LONGER-LASTING MAT PERFORMANCE.

A SERVICE SCHEDULE THAT WORKS FOR YOUR BUSINESS.

01 DROP, SWAP & LAUNDER

Simple mat servicing with minimal disruption.

Place your used mats at an agreed collection point and we'll collect them on schedule, replacing them with freshly laundered mats.

Drop

You drop your used mats at the agreed collection point.

Swap

We collect the used mats and replace them with freshly laundered mats.

Launder

We professionally launder the used mats, ready for their next service.

02 LIFT, LAY & LAUNDER

Complete on-site mat collection and servicing, handled by CLEAN.

Our service operative visits your site, lifts the used mats and replaces them with freshly laundered mats, taking the used mats away for professional laundering.

Lift

We lift your used mats from throughout your business, collecting them directly from where they're in use.

Lay

We replace them with freshly laundered mats, laid in place ready to use.

Launder

We take the used mats away for professional laundering, ready for their next service.

DO **YOU** KNOW?

Antimicrobial mats help **inhibit** the growth of germs and bacteria, making them ideal for hygiene-critical workplaces.

CLEAN
LINEN & WORKWEAR

THE RIGHT MAT IN THE RIGHT LOCATION

Every business is different, that's why every mat plan should be too.

The right mats, in the right places, help keep people safe, protect your floors and create a cleaner, more professional environment.

From entrances and walkways to work areas and high-risk zones, our recommendations are designed around how your business really works.

MAT KEY

- Outdoor Mat
- Welcome Mat
- Logo & Image Mat
- Everyday Mat
- Health & Safety Mat
- Anti-fatigue Mat

01 MANUFACTURING

Protect high-traffic and high-risk areas, reduce slips, improve comfort for staff and help maintain a cleaner, safer working environment.

02 HOTEL RECEPTION

Create a warm welcome while protecting your floors and keeping entrances clean, safe and looking their best.

Part of the ALSCO family

DO **YOU** KNOW

A well-planned matting solution can reduce slips, protect floors, improve cleanliness and **leave a positive impression** on everyone who walks through your doors.

03 OFFICES

Keep entrances and walkways clean and professional, reduce dirt and moisture and create a safer, more comfortable workspace.

04 RESTAURANTS

Help prevent slips in busy areas, protect floors from spills and footfall and support a cleaner, more hygienic dining experience.

DO **YOU** KNOW

Where you place a mat can make a real difference. For example, positioning anti-fatigue matting where employees spend prolonged periods standing helps **reduce discomfort** and **injury**.

EVERY DAY MATS

A durable indoor mat that captures dirt and moisture, providing reliable everyday floor protection in busy commercial environments.

Designed for commercial entrances, receptions and busy walkways, this high-performance mat is ideal for areas with heavy pedestrian traffic. Its coarse nylon fibres effectively remove dirt and moisture from footwear before it spreads through your building, helping keep floors cleaner, safer and reducing cleaning costs. As part of our fully managed rental service, every mat is regularly collected, professionally laundered and returned ready to perform, maintaining its appearance and effectiveness over time.

Built with durable regenerated nylon fibres and a nitrile rubber backing, it's designed to withstand daily use while delivering consistent performance. Available in a choice of colours to complement your workplace.

Complete your floor protection solution

Pair with an Outdoor Scraper Mat to remove heavy dirt and debris before it reaches your Everyday Mat, maximising its performance and lifespan.

ANTI-FATIGUE MATS

A premium anti-fatigue mat that improves comfort for standing workers while helping create a safer, more productive workplace.

Designed for workstations, production lines, service counters and packing areas, this ergonomic anti-fatigue mat helps reduce fatigue caused by prolonged standing, improving comfort and support throughout the working day. Suitable for dry or damp environments, it's built to withstand demanding commercial and industrial use.

Manufactured from high-density closed-cell nitrile foam, it offers excellent resistance to water, oils, grease and chemicals while antimicrobial protection helps maintain hygiene and prolong the life of the mat.

As part of our fully managed service, your mats are regularly inspected and exchanged as required, ensuring they continue to perform at their best.

Complete your floor protection solution

Pair with Health & Safety Mats to reinforce important workplace messages while improving comfort in standing work areas.

Specifications

Style Cushion Complete
Material High-density closed-cell nitrile/PVC blended foam
Surface 100% nitrile rubber with antimicrobial treatment
Thickness 16mm (5/8")

Benefits

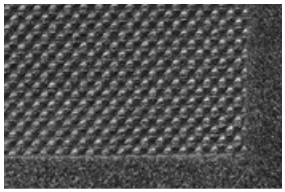

- Superior anti-fatigue support for standing workers
- Suitable for dry and damp working environments
- Resistant to water, oils, grease and chemicals
- Fully managed service – we inspect, exchange and maintain your mats
- Antimicrobial treatment helps protect against odours and degradation
- Bevelled edges help reduce trip hazards

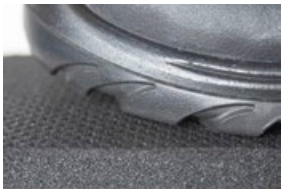

Features

- Available in solid or drainage versions
- High-density closed-cell nitrile foam construction
- Lightweight and flexible for easy handling
- Bevelled safety edges
- High-traction surface
- Chemical and grease resistant
- 16mm thick ergonomic cushioning
- Suitable for commercial and industrial workplaces

Designed for outdoor and kitchen entrance areas, this heavy-duty scraper mat removes dirt, grit and mud before it reaches your building, helping keep floors cleaner and reducing cleaning costs.

As part of our fully managed rental service, every mat is regularly collected, professionally laundered and returned ready to perform, maintaining its appearance and effectiveness over time.

Custom printed with your logo or artwork, it combines practical floor protection with a powerful branding opportunity.

Complete your floor protection solution

Pair with an absorbent indoor mat such as our Everyday Mat to capture remaining moisture and help reduce slip risks.
