

Eco Drawstring Chef Trouser

These chef trousers are made from a sustainable blend of **65% recycled polyester** and **35% cotton** sourced from the **Better Cotton Initiative (BCI)**.

They have a fabric weight of 195gsm and each pair of trousers helps recycle up to 11 plastic bottles. Additionally, using recycled polyester consumes up to 50% less energy than producing virgin cotton, significantly reducing CO₂ emissions. Designed for comfort and ventilation, these trousers ensure that the wearer stays cool during long shifts.

They feature a baggy fit with a leg length of 32 inches, twin hip pockets, a rear patch pocket, and a zip fly, combining functionality with eco-friendly benefits.

Specifications

Style CT3082ECO
