LINEN & WORKWEAR

Linen replenishment **made easy**

LINEN

HOTELS

RESTAURANTS

SERVICED
APARTMENTS

- In excess of 70% of CLEAN's customers now use Streamline
- Streamline will:
 - Reduce your costs and always ensure that sufficient levels of stock are available
 - Transform your linen room and significantly reduce administration and paperwork

REASSURANCE & CONFIDENCE

CLEAN

LINEN & WORKWEAR

- The right stock is available at the right time
- Seasonal factors are anticipated and covered
- Your housekeeping team are better informed
- Full visibility of planned delivered quantities provided

STREAMLINE BENEFITS

Effective stock management

Less labour intensive

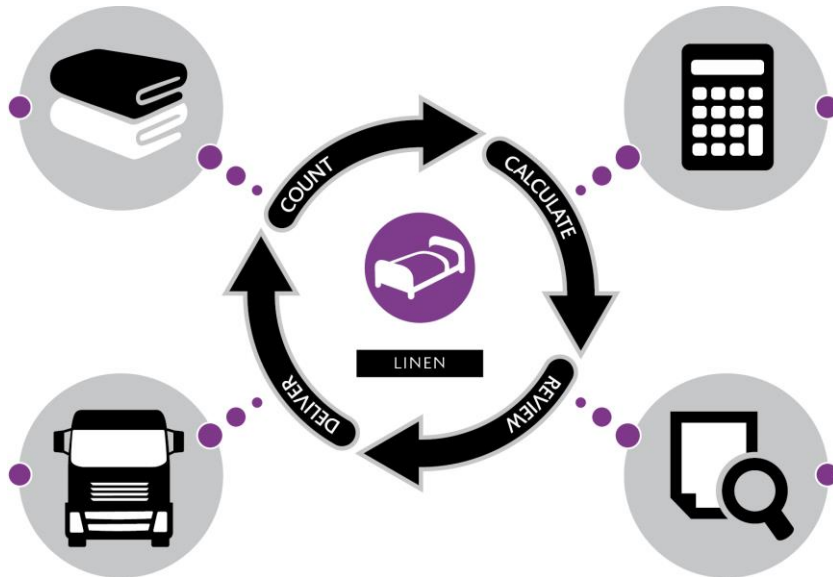

Saves time

Consistent delivery

Buffer Stock Consistent

- Better stock control & linen room management
- Less labour intensive (no more soiled counts)
- Submitting a clean linen room count once a week is easier, saves time and reduces administration
- More consistent deliveries and invoices, reflecting occupancy levels
- Streamline maintains a 'buffer' stock and provides the flexibility to respond to unexpected events

HOW DOES IT WORK?

- **Count** - your housekeeper counts the clean linen stock and submits figures once a week - no more daily soil counts
- **Calculate** - CLEAN calculate the next week's delivery schedule ensuring it is in line with recent and forecast usage and current linen room stock
- **Review** - your housekeeper reviews the Streamline schedule and amends in line with anticipated occupancy levels
- **Deliver** - CLEAN delivers intelligently managed quantities of stock

FOR EXAMPLE...

- Let's say you use 100 pillowcases per day
- Your Agreed Shelf Count (ASC) for pillowcases will be 150
 - we will deliver 100 per day
- Your submitted Actual Linen Count (ALC) is 80 pillowcases
 - You've had a busy week using 70 pillowcases from your buffer stock
- Streamline will automatically adjust the following week's delivery schedule
- Each day pillowcases (10 extra) will be delivered ensuring your buffer stock of pillowcases is restored to the agreed level

- Our Streamline specialists work with you to:
 - Monitor and analyse your weekly Actual Linen Count (ALC)
 - Ensure you don't waste money on unrequired quantities of stock
 - Reduce the risk of running out of stock
 - Factor in other elements using their knowledge and understanding of your hotel, plus any seasonal and one-off influences
